

MEDICAL SUPPLIES

6452

(No.21 May 2016)

Responsibility

Camp Commander (DAI)

Requisitions for medical supplies shall be directed to the institutional pharmacy and approved by the Chief Medical Officer. Camp non-medical personnel will allow offenders access to over the counter type medicine/medical supplies. All medical supplies dispensed to an offender will be documented on a medication log sheet by the officer dispensing the item. The medication log sheet will contain the following information: The date dispensed, offender's name and CDCR number, medical supply issued, amount, and the reason for distribution.

Superintendent (DJJ)

An adequate inventory of medical supplies shall be maintained by DJJ. Medical supplies dispensed by non-medical personnel in camp shall be limited to first-aid applications and non-controlled medicines intended to relieve minor symptoms of common distress. Each camp shall adopt procedures to assure ward receives prescribed medications.

Duty Officer

At scheduled times of the day, offenders shall report to the office to receive medications which have been prescribed. Offenders with prescribed medication will be allowed access to take the prescribed dosage by the Duty Officer according to the prescription and logged a medication log sheet.

FIRST-AID KIT

6452.1

(No.21 May 2016)

Responsibility

Work Area Supervisors

Each emergency crew transport shall have a trauma kit, which shall be properly maintained, and contain the supplies that are consistent with the scope of practice of a First Responder or EMT1. CAL FIRE will replace first-aid items used to treat offender injuries. If CDCR feels that the items carried in CAL FIRE first-aid kits are not adequate, they may provide additional kits or supplies as required by law. All supervisors of conservation camp crews will receive first-aid and CPR training. In addition to the trauma kit, each CCV or ECT will carry a CAL FIRE approved Burn Kit as specified in [Section 1810](#) of CAL FIRE policy. CAL FIRE staff will limit treatment of offenders to emergency illness or injury. CDCR staff will provide treatment for all other offender illness or injury.

In addition to the trauma kit, each emergency crew transport vehicle should consider carrying an Automatic External Defibrillator (AED) and the following extrication and patient handling equipment:

- 1 Long spine board
- 1 Extrication Collar, S
- 1 Extrication Collar, M
- 1 Extrication Collar, L
- 2 1-1/2 to 2" nylon restraining straps (12 ft.) with "D" ring or latch
